PROFESSIONAL SUMMARY

Master of Information Systems and Technology student at Curtin University (Data Analytics and Visualisation, CWA 82.18), with a bachelor's degree in statistics and finance. I build Power BI dashboards on data I have audited and modelled myself, and I forecast in R so the method can be checked. As Finance Lead on Curtin Consulting Group's Hockey WA engagement, I gathered requirements in fortnightly client meetings and built a 20-year model whose sensitivity testing reshaped the strategy recommendation. Five portfolio projects run on their real data at waranyu-cv.vercel.app. Seeking a data analyst internship in Perth, and graduate roles from July 2027.

EDUCATION

Master of Information Systems and Technology **2025 – Present**
Curtin University (Faculty of Business and Law), Western Australia
Specialisation: Data Analytics and Visualisation | Expected graduation: July 2027 | Course Weighted Average: 82.18
Relevant units: Business Analytics and Data Visualisation (92), Business Intelligence and Analytics (90), Systems Analysis (84)

Bachelor of Science and Technology **2019 – 2023**
Thammasat University, Thailand
Major: Statistics | Minor: Finance

KEY SKILLS

Data Analysis – SQL, Python, Excel, Power BI, Power Query, DAX, Tableau, R, Oracle SQL, data cleaning and quality auditing.

Data Modelling and Database Design – ERD design, dimensional modelling, star and galaxy schemas, normalisation, data dictionaries.

Forecasting and Financial Modelling – Linear regression, time-series analysis and forecasting in R; break-even, payback, scenario and sensitivity models in Excel; CapEx/OpEx cost estimation.

Business Analysis and Communication – Requirements gathering and analysis, stakeholder communication and presentations, technical documentation, dashboards and reports.

RELEVANT EXPERIENCE

Student Consultant (Finance Lead) **Jul 2026 – Oct 2026**
Curtin Consulting Group – Client: Hockey WA

- Built a 20-year Excel break-even model across 3 scenarios for Hockey WA's broadcast streaming strategy, with assumptions benchmarked against 15+ case studies, giving the board a clear, traceable payback range.
- Tested 5 drivers at plus or minus 20% and found audience growth moved payback 7 times more than build cost, refocusing the recommendation on marketing over upfront funding.
- Priced an 18-camera AI streaming setup across 6 playing surfaces from 9 public sources, splitting one-off setup from annual running costs (CapEx/OpEx) for the model.
- Led the financial analysis in a 9-person team, gathering and confirming requirements with Hockey WA in fortnightly client meetings and feeding them into the model's scenarios and assumptions.
- Created an 18-camera 3D venue render and a 3-view streaming prototype, turning the plan into something the client and panel could see and use.

Digital Marketing & Data Analytics Intern **Nov 2022 – Jan 2023**
Like Me Co., Ltd. – Bangkok, Thailand

- Supported digital marketing campaigns through social media content, product research, and competitor analysis.
- Conducted basic data tracking and market research to support campaign planning and business decisions.
- Assisted with content writing and customer trend analysis to improve marketing communication.

ACADEMIC PROJECTS

FreshMart Sales Performance Dashboard See the project ↗

Power BI, Power Query, Data Cleaning, DAX, Kimball Star Schema

- Audited data quality and cleaned 5 raw operational files in Power Query, remapping 93 orphaned sales rows instead of dropping them, keeping revenue totals accurate and the data gap visible.
- Modelled 17,697 transaction lines across 12 stores into a star schema with DAX KPIs for revenue, gross margin and year-on-year growth, showing which regions and categories drive profit.

Renewable Electricity Transition Dashboard See the project ↗

Power BI, Power Query, DAX, R, Linear Regression, Policy Analysis

- Reconciled data from national energy agencies into a Power BI galaxy schema, showing Australia's renewable share rising from 9% in 2005 to 35% in 2024, benchmarked against Germany, New Zealand and China.
- Linked the trend to policy: share stalled while the Renewable Energy Target was under review, then grew nearly 5 times faster after the 2015 target reset.
- Forecast with R linear regression that Australia reaches only 37.8% renewable share by 2030 against the 82% target, showing the target is unlikely on the current trend.

Building and Benchmarking a Domain-Specialist AI Model (LocoLLM) See the project ↗

Quality and Documentation Manager – Client: LocoLabo, Curtin Business School

- Evaluated the base AI model across 15 business areas and pinpointed Australian privacy law as a weak spot, giving the client clear evidence to approve the project focus.
- Learnt enough Australian privacy law to help train a LoRA privacy-law adapter, raising accuracy on a sealed 170-question test from 15% (original untrained model) to 81% (final run).
- Documented controlled experiments (one setting changed per run, repeated with a new random seed) in a 6-step handover recipe and client presentation, so the next team can reproduce the method.

Football Club Database Design and SQL Implementation See the project ↗

Group project (3) – Oracle SQL, ERD, Normalisation

- Translated 18 business requirements into an ERD and a normalised 16-table Oracle schema with a data dictionary, loaded with a full sample season of 56 games.
- Wrote 9 analytical SQL queries using joins, subqueries and HAVING to answer organiser questions such as the season ladder, using a LEFT JOIN so goalless games keep averages accurate.

IT Infrastructure and Capital Plan for a Government Department See the project ↗

Pair project, designed jointly – Excel, Visio

- Costed every item from cited supplier prices in Excel, splitting CapEx and OpEx and keeping Year 1 to about a third of the A$2.1M budget, with the rest reserved for failures and upgrades.
- Compared 5 WAN options on cost, latency and reliability, choosing Starlink over Sky Muster for 4 remote sites because of latency (~30 ms vs ~665 ms) for VoIP calls.

ADDITIONAL EXPERIENCE

Supervisor **Nov 2023 – Present**

Six Senses Gourmet, Leederville, Western Australia – promoted twice in 12 months from Waiter and Bartender

- Supervise a team of around 5 staff per shift, handling customer requests and coordinating service so orders and payments stay accurate during busy periods.
- Onboarded around 8 new staff on service standards, ordering and payment processes, keeping service consistent across shifts.
