PROFESSIONAL SUMMARY

Master of Information Systems and Technology student at Curtin University, specialising in data analytics and visualisation, with a bachelor's degree in statistics and finance. I build Power BI dashboards on data I have audited and modelled myself, and I forecast in R so the method can be checked. Most recently I led the financial analysis for a Curtin Consulting Group engagement with Hockey WA. Four portfolio projects run on their real data at waranyu-cv.vercel.app. Seeking a data analyst internship in Perth, and graduate roles from July 2027.

EDUCATION AND TRAINING

Master of Information Systems and Technology **2025 – Present**
Curtin University, Western Australia
Specialisation: Data Analytics and Visualisation

Bachelor of Science and Technology **2019 – 2023**
Thammasat University, Thailand
Major: Statistics | Minor: Finance

KEY SKILLS

Data Analysis and Visualisation – Skilled in using Power BI, Tableau, Excel, Python, and R to clean, analyse, and present data insights through dashboards and reports.

Data Modelling and Database Design – Knowledge of SQL, ERD design, dimensional modelling, star schema design, and database structure.

Forecasting and Financial Modelling – Experienced in linear regression, time-series analysis, forecasting and prediction intervals in R, and in break-even, scenario and sensitivity modelling in Excel.

Communication and Data Storytelling – Able to explain data findings clearly through dashboards, reports, and presentations.

RELEVANT EXPERIENCE

Student Consultant (Finance Lead) **Jul 2026 – Nov 2026**
Curtin Consulting Group – Client: Hockey WA

- Led the financial analysis in a 9-person team developing Hockey WA's broadcast streaming strategy.
- Built a 20-year Excel break-even model across 3 scenarios, giving the board a payback range to decide on, in place of a provider arrangement that returned no revenue.
- Tested 5 drivers at ±20%: audience growth moved payback 7× more than build cost, refocusing the recommendation on marketing over upfront funding.
- Benchmarked assumptions against 15+ case studies, so every forecast could be traced to a public source.
- Created an 18-camera 3D venue render and a 3-view streaming prototype, turning the plan into something the client and panel could see and use.

Digital Marketing & Data Analytics Intern **Nov 2022 – Jan 2023**
Like Me Co., Ltd. – Bangkok, Thailand

- Supported digital marketing campaigns through social media content, product research, and competitor analysis.
- Conducted basic data tracking and market research to support campaign planning and business decisions.
- Assisted with content writing and customer trend analysis to improve marketing communication.

ACADEMIC PROJECTS

MGMT6052 Consultancy Project (Capstone)

Quality and Documentation Manager – Client: LocoLabo, Curtin Business School

- Tested the base AI model across 15 business areas and identified Australian privacy law as its weakest, giving the client clear evidence to approve the project focus.
- Trained a privacy-law expert adapter that reached 81% accuracy on a sealed 170-question test, using only free tools, proving the client's "small model, plug-in expert" idea works.
- Found a one-line training setting that more than doubled accuracy (38% to 81%), now the core of the recipe recommended to the client.
- Delivered a 6-step handover recipe and client presentation, so the next team can build an adapter for a new subject much faster.

FreshMart Sales Performance Dashboard See the project ↗

Power BI, Power Query, DAX, Kimball Star Schema

- Audited 5 raw operational files in Power Query and remapped 93 orphaned sales rows instead of dropping them, keeping revenue totals accurate and the data gap visible.
- Modelled 17,697 transactions across 12 stores into a Kimball star schema, so managers can see which regions and categories drive profit without stitching spreadsheets together.
- Built DAX measures for revenue, gross margin and year-on-year time intelligence, so growth is judged against a fair like-for-like comparison rather than a raw total.

Renewable Electricity Transition Dashboard See the project ↗

Power BI, Power Query, DAX, R, Linear Regression

- Reconciled electricity data from 4 national agencies into a galaxy schema with GWh-to-TWh conversion, so country totals cannot be double-counted.
- Built a Power BI dashboard tracking Australia's renewable share from 9% to 35% (2005–2024), benchmarked against Germany, New Zealand and China.
- Forecast to 2035 with R linear regression (R^2 0.85, 95% prediction interval), quantifying a 44.6% share against the 82% target for decision-makers.

Football Club Database Design and SQL Implementation See the project ↗

Group project (3) – Oracle SQL, ERD, Normalisation

- Translated 18 business rules into an ERD and a normalised 16-table Oracle schema, so questions like the season ladder are answered without duplicated data.
- Wrote 9 analytical SQL queries using joins, subqueries and HAVING, answering real organiser questions such as the ladder, top scorers and goals per ground.
- Used a LEFT JOIN to keep goalless games in the averages, avoiding the inflated goals-per-ground figures an inner join would have produced.
- Revised the finished design after review, removing a many-to-many table and correcting 2 business rules, so the schema matches what the data represents.

ADDITIONAL EXPERIENCE

Supervisor **Nov 2023 – Present**

Six Senses Gourmet, Leederville, Western Australia

- Delivered customer service in a fast-paced restaurant environment, including taking orders, serving food and drinks, bartending, and processing bills.
- Managed multiple tasks under pressure while maintaining accuracy with orders, payments, and customer requests.

PROFESSIONAL DEVELOPMENT

Google Data Analytics Certificate Courses **Completed May 2026**

Coursera / Google

- Foundations: Data, Data, Everywhere
- Ask Questions to Make Data-Driven Decisions
- Prepare Data for Exploration
